

FullStack Developer**Experience Summary**

- Senior Backend Engineer with 11+ years of experience in the IT industry, including 8+ years of hands-on experience building and scaling Node.js applications.
- Strong expertise in developing high-performance server-side applications using **Node.js**, with deep understanding of asynchronous programming, event-driven architecture, and non-blocking I/O.
- Extensive experience in designing, developing, and maintaining **RESTful APIs** with a focus on scalability, security, and performance.
- Proficient in backend frameworks such as **Express.js / NestJS** for routing, middleware management, and building modular, maintainable services.
- Hands-on experience with **SQL (MySQL) and NoSQL (MongoDB, DynamoDB)** databases, including schema design, query optimization, and ORM/ODM tools like **Sequelize and Mongoose**.
- Solid experience with Amazon Web Services (**AWS**) including S3, Lambda, DynamoDB, API Gateway, CloudWatch, and ECS, supporting cloud-native and distributed systems.
- Familiar with CI/CD pipelines and DevOps practices using tools such as **Jenkins, Github Actions and Docker**

Technical Competencies

- **Programming Language:** Node.js, JavaScript, NestJS, ExpressJS, Typescript, Angular
- **Devops and Automation:** Docker, Jenkins
- **Cloud:** AWS
- **Database:** MySQL, MongoDB, DynamoDB

Generative AI / LLM Skills (Node.js)

- Practical understanding of integrating **Large Language Models (LLMs)** with **Node.js backend applications** through learning and hands-on experimentation
- Knowledge of **prompt engineering techniques** for structured responses, validations, and controlled outputs
- Understanding of **Retrieval-Augmented Generation (RAG)** architecture and workflow concepts
- Working knowledge of **text embeddings** and **semantic search** techniques
- Exposure to **vector databases (Chroma)** for similarity-based information retrieval
- Understanding of **LLM-powered backend use cases** such as Q&A, document analysis, and summarization

Work Experience

- Manager at Capgemini Technology Services India limited: Sep-2024 to till date
- Senior Software Engineer at Mphasis Ltd: Nov-2021 to Sep-2024
- IT Analyst at Tata Consultancy Service: Aug-2018 to Nov-2021
- Software Engineer at Greytrix India Pvt Ltd: June-2015 to July-2018
- Software Programmer at IT Consultancy Services: Apr-2014 to Apr-2015 (Currently known as Syncnetic Software)

Projects Experience Summary

Organization: Capgemini (Sep-2024 to till date)

1. Project Name: IKEA Coworker Tool

- **Environment:** Node.js, NestJS, Typescript, AWS, Microsoft Navision
- **Description:**
 - Developed and maintained a store-based employee ordering web application for IKEA across multiple countries, enabling store staff to place customer orders via tablets. The application supports in-store product selection, order creation, and integration with backend systems to streamline retail operations across multiple markets.
- **Responsibilities:**
 - Worked as a Backend Developer responsible for maintaining and enhancing an existing large-scale retail application.
 - Handled feature enhancements, bug fixes, performance improvements, and production support using Node.js, NestJS and AWS, ensuring high availability and market-specific stability.
 - Collaborated closely with client stakeholders to understand requirements and translate business logic into backend implementations.

2. Project Name: SPICE Integration

- **Environment:** Node.js, AWS
- **Description:**
 - SPICE is a scalable and configurable data integration platform designed to process and securely deliver data between multiple systems, with features such as message batching/splitting, payload decryption, failover handling, and delivery scheduling.
- **Responsibilities:**
 - Upgraded Node.js version and refactored related components to ensure compatibility and improved the performance.
 - Fixed critical bugs in the platform to enhance stability, reliability, and data processing accuracy.

Organization: Mphasis (Nov-2021 to Sep 2024)

3. Project Name: Diligence dashboard application

- **Environment:** Node.js, NestJS, AWS, Angular, MySQL, Jenkins, Docker, Jira, Git
- **Description:**
 - The objective is to create a nonemailbased exception management platform used by secondary marketing to organize, assign, and track the resolution of conditions within loan packages.
 - These conditions were identified by investors evaluating the quality of documentation supporting a loan sale.
- **Responsibilities:**
 - Development of backend API's using NodeJS, NestJS and SQL queries
 - Implemented AWS Solutions using S3 Bucket, Lambda, IAM, ECR, ECS, CloudWatch etc.
 - Setup full CICD processes with Jenkins and Docker to improve development cycles
 - Coordinate with Business Analyst, Client for understanding and discussing requirements.

Organization: Tata Consultancy Service (Aug-2018 to Nov-2021)

1. Project Name: Frasers

- **Environment:** Node.js, ExpressJS, SQL Server, Jira, Git, Postman, VS Code
- **Description:**
 - Frasers Home system application that will collaborate multiple home systems and mobile applications to create a seamless digitized experience.
- **Responsibilities:**
 - Developed APIs that enabled seamless communication between front-end and back-end components, enhancing application functionality
 - Development of Components using Angular, Typescript
 - Developed and maintained database using SQL Server

2. Project Name: Invisible Tickets

- **Environment:** Nodejs, SQL Server, Microsoft Azure, Git, Postman, Visual Studio Code, JIRA
- **Description:**
 - Creating ticketing solution for giving users experience to travel seamlessly without buying ticket before travelling and charging user at end of day for all trips
- **Responsibilities:**
 - Development of backend API's using NodeJS and SQL queries
 - Developing and designing database

Organization: Greytrix India Pvt Ltd (June-2015 to July-2018)

Worked on the web applications using Node.js, Express.js, AngularJS, and MongoDB, focusing on production bug fixes, performance improvements, and refactoring legacy systems to improve maintainability.

Organization: IT Consultancy Services | Software Engineer (Apr-2014 to Apr-2015)

Provided application support, incident handling, and operational assistance for enterprise systems

Education

- **2013** BEIT from Mumbai University - 66%
- **2010** Diploma in IT from MSBTE - 76%
- **2007** SSC from Maharashtra State Board – 87
